

# Jose de Jesus Rodriguez Aparicio

---

Teotihuacan Estado de Mexico 55850 | 5563672319 | 5949582483 | chucho970407@gmail.com

## Professional Summary

- Software Engineer with 7+ years of experience in backend development, microservices, and Oracle CPQ. Strong background in Java, Spring Boot, and database design. Proven ability to lead projects, implement scalable solutions, and adapt quickly to new technologies.

## Education

### **CERTIFICATED HIGH SCHOOL | 2015 | CECYT NO.8 NARCISO BASSOLS**

- Main Speciality: Computational Technician
- Subjects about: Programming, Web Designed, Animation, Databases, Computational Architecture

### **ESCUELA SUPERIOR DE SISTEMAS COMPUTACIONALES|2016-2022|ESCOM**

- Studies in Programming, Mathematics, Personal Development, IA, Computational Geometry, Recognition Patterns, Distributed Computing ,Databases, Circuits, and Web Designed

### **COURSES**

- **BEDU** Studies in Data Science (MongoDB, MySQL,R, Python)
- **INOVACCION** Studies in Microsoft Azure Service and IA
- **ANGLO** Studies in English Language
- **CELEX** Studies in English Language
- **IBM** Studies in Microservices

### **CERTIFICATES**

- Scrum Developer Professional Certificated by CertiProf
- CCNA Network Fundamentals
- CCNA Introduction in Cybersecurity
- Microsoft Azure Fundamentals (AZ-900)

### **CERTIFICATES LANGUAGE**

- ESOL English Language by Cambridge
- CELEX English Language by IPN

### **LANGUAGE**

- English
- German

### **TECHNICAL SKILLS**

- **Programming Languages:** C, C#, Java, Python, SQL, R, Swift, BML, VHDL, PHP, Android.
- **Web Technologies:** HTML5, CSS3, JavaScript, JQuery, AJAX, Bootstrap.
- **Frameworks:** Spring Boot, Quarkus, Knockout, OJET.
- **Databases:** MySQL, MongoDB, MariaDB (design, implementation, and optimization).
- **APIs & Integration:** REST APIs, RAML, JSON, XML, microservices.
- **Other Skills:** Socket programming, computational theory, pattern recognition.

## TOOLS

- **Version Control & CI/CD:** Git, GitHub, GitLab, Jenkins, Bitbucket
- **Monitoring & Analytics:** Kibana, SonarLint
- **API & Testing:** Swagger, Postman
- **Cloud & Services:** Firebase, Sandbox
- **Frontend Utilities:** Bootstrap

## SYSTEMS

- Windows, Linux, IOS

## Experience

### WEB MASTER AND MAINTAINANCE| V-SYSTEMS | SEP-2015 |

- Developed and maintained web pages using HTML5, CSS, and JavaScript.
- Provided technical support for computational equipment and web platforms.

### PROJECT FOR LABORATORIES OLARTE Y AKLE

- Designed and implemented a management system with Bootstrap, PHP, MySQL, MariaDB, JavaScript, JQuery, and AJAX.
- Developed an Android application for medical appointment booking and management, integrating GPS, Firestore, CloudStore, Realtime Database, MySQL, and Speech Recognition, with layouts using LinearLayouts and Fragments.

### IDS COMECIAL (ASSIGNATED TO BBVA PROJECT) | BACK END | MAY 2021 |DIC 2021

- Developed backend services using Java 11 with Quarkus and IntelliJ IDEA.
- Designed and consumed REST APIs in RAML for microservices integration.
- Validated and tested microservices using Postman.
- Collaborated as iOS Developer in parallel tasks.

### BANCO AZTECA | BACK END | OCT 2021 | MAY 2022

- Built and maintained backend solutions with Java 8 and Spring Boot.
- Consumed and tested microservices with Postman and Swagger.
- Monitored and analyzed system performance through Kibana.
- Implemented MongoDB for data management and storage solutions.

### ORACLE | PROGRAMMER ANALYST |APPLICATION DEVELOPER 2| MAY 2022

- Developed BML, Java, and JavaScript solutions for Oracle CPQ.
- Designed and implemented REST APIs for new services.
- Led projects for new implementations and system adaptability.
- Managed bug fixing (RCA) and provided technical support.
- Oversaw Knockout and OJET framework integration.
- Coordinated cross-functional teams to resolve ticket issues.
